04.2017 - 04.2020

StreamAMG

Senior Front end Developer

As front-end developer for StreamAMG I build video streaming web applications in scalable and collaborative way - focusing on creating fast and responsive UI/UX while emphasizing code structure and component modularity and ease of use. Aside from web applications, largest product that I contributed to was Kaltura video player. My responsibilities for video player development included: different ad providers integration, payment system integration for paid content, UI/UX....

Latest noteworthy projects:
